AN Alpha Pulse Model Portfolio

AN Alpha Pulse is a **rules-driven, factor-based equity strategy model** that adapts to changing market trends.

It dynamically rotates across **Momentum, Value, Growth, Quality, and Low Volatility factors,** aiming to capture larger opportunities while managing risk.

Key Features

Dynamic Factor Rotation: Shifts between Momentum, Value, Growth, Quality, and Low Volatility based on market leadership.

Completely Rule-Based: Eliminates emotion and bias from stock selection.

Large & Midcap 250 Universe: Selects from the Large & Midcap 250 universe of liquid stocks.

20 Stock Diversified Portfolio: 20 equal-weighted stocks with risk-aware portfolio design.

Our Investment Edge

Universe
Stocks are screened from the Large & Midcap 250 universe using an in-house quantitative scoring engine. Each stock is evaluated across multiple factors with historical simulations to ensure robustness across cycles.

Process
A disciplined framework identifies stocks using Multi-factor percentile scoring, Risk-adjusted return filters, Technical price and Volume confirmation.

Strategy
Systematically aligns the portfolio with the prevailing factor trend, single or multi-factor, while maintaining diversification and risk control.

IMP Intelligent Model Portfolios

The Unique Aspects

- **Adaptive Factor Leadership:** Evolves with markets instead of staying locked into one style.
- **Quant Discipline with Transparency:** Fully rule-based, objective, scalable, and repeatable investment process.
- **Balanced Risk Participation:** Combines trend capture with diversification and risk filters to control drawdowns.

Rebalancing Strategy

Monthly review based on changes in factor rankings and risk-adjusted momentum signals.

Investor Profile

Designed for investors with a 3+ year horizon seeking an active, data-driven, rules-based equity strategy.

The Essentials
