MO Technical Focus Model Portfolio

MO Technical Focus Model Portfolio is a **technical analysis–based strategy** that identifies stocks in strong uptrends and aims to capture sustained price momentum with disciplined risk management.

Key Features

Focused Portfolio Construction

Typically holds 8-12 high-conviction stocks.

Trend-Based Stock Selection

Stocks chosen based on strong and sustained uptrend patterns.

Relative Strength Framework

Preference for stocks outperforming their sector and the broader market.

Active Risk Management

Defined exit rules and drawdown controls.

Dynamic Exposure Management

Ability to partially move into cash during weak market phases.

Our Investment Edge

Universe

Scans the broader market across sectors to identify strong price trends.

Process

Stocks evaluated based on:

- Trend strength & structure
- Relative strength vs sector and benchmark
- Price and volume confirmation
- Risk-controlled position sizing

Strategy

Captures short to medium term price trends, allowing winners to run while limiting downside through disciplined exit rules and portfolio-level risk controls.

The Unique Aspects

Disciplined Trend-following Framework built on technical analysis principles.

Clear Entry and Exit Rules to remove emotional decision-making.

Structured Risk Management to control drawdowns during phases of market stress.

Rebalancing Strategy

- Continuous monitoring of market trends.
- Portfolio adjustments when trend conditions change.

Investor Profile

Investors seeking to capture short to medium term market trends through a technical strategy and comfortable with active management and higher volatility.
